

NIKON MOHAPATRA

A result oriented developer with 2+ years of experience adept at end to end software development. Well acquainted with relational and non-relational databases & in-depth knowledge of OOP paradigm, REST APIs and MVC frameworks. Areas of interest- machine learning and AI.

Looking forward to opportunities and challenges to utilize my skillsets and grow as a professional.

EXPERIENCE

Software Engineer | IDS Logic | Sep 2018 – Present

- Took responsibilities of back-end as well as front-end development in multiple assignments. Gained hands on experience on MVC frameworks and relational as well as non- relational databases
- Deployed multiple phases of an enterprise project aimed at optimizing wireless expenses, using Kohana and MS SQL Server
- Delivered REST APIs for a chat bot based on Wit.Ai using Python Flask and Mongo. Developed server-side logic for mobile apps and assisted in API integration.

Systems Engineer | Infosys Limited | May 2014 – Sep 2015

- Took the role of functional analyst with responsibilities of analysing requirements, writing, and releasing new scripts
- Got involved in PL/SQL programming for report generation along with error tracking
- Delivered stored procedures and Oracle packages and collaborated with web service team for simplifying business processes

CERTIFICATIONS
